

Monash E-Store User Manual

Welcome to Monash E-Store! This user manual will provide you with an overview of the main functionalities of the application, allowing you to navigate and make the most of your online shopping experience.

Before main.py is run for first time ensure data/users.txt, data/orders.txt and data/products.txt is present else create

When main.py is run for first time, checks if super admin exists if it doesn't exist it creates a new superadmin with credentials as follows:

- User_name = super_user
- Password = superadmin1

To not to harm the the flow of the program a test customer is also registered of which data can be accessed from "data/users.txt"

Best experience is to run generate test data after running main for first time and access new user_names from "data/users.txt" and the password for all of the customers generated from this method is ***password123*** .
